

4 Key Stakeholders

Approvals are required from all four stakeholders to legally start your food truck

دائرة التنمية الاقتصادية
DEPARTMENT OF ECONOMIC DEVELOPMENT

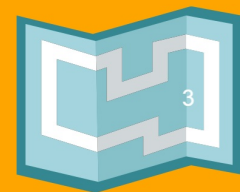

The Process

1
Submit a Business Plan to Dubai Economic Department and Dubai Municipality. Only once the plan is approved can you move to the next stages.

2
Majority of the food trucks in Dubai need to be backed by a central kitchen where you can pre-prepare some of your offerings. In this stage you need to submit a HCCAP certified kitchen layout for Government approval.

3
The design and fitout of your truck is very crucial. In this step, you will create a HCCAP certified blueprint of your truck and seek government approvals on the blueprint.

4
The next stage will involve sourcing the right location for your food truck. Currently, these locations are limited and a majority of them are owned by individual landlords.

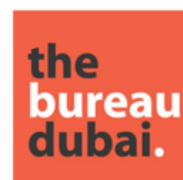

5
Once you get relevant approvals you can start sourcing and fitting out your food truck, either locally or internationally.

6
Your food truck is now ready to launch!
